OUR STORY

Crafted With Passion,
Trusted by Champions

SS Cricket was founded in 1969 in Meerut, Uttar Pradesh — the cricket equipment capital of the world. For over five decades, we have been handcrafting bats, pads, gloves, and protective gear for cricketers at all levels.

From gully cricket to Test matches, SS Cricket has been the trusted companion of players who dream big. Our artisans bring decades of experience to every piece they make.

Mon - Sat: 9am to 6pm

EXPLANATION:

SS Cricket Website — File Explanation

index.html — Page Structure

- Standard HTML5 document with UTF-8 charset, viewport meta tag, and linked style.css
- Fixed header with logo ("SS Cricket") and 7 navigation links for in-page scrolling
- Hamburger icon (3 bars) included for mobile menu toggle
- Hero section covers full viewport with a pill badge, main heading, subtitle, and two CTA buttons
- Promo strip below hero shows 4 trust badges: Free Shipping, Easy Returns, Secure Payment, Quality Assured
- Bestsellers section has 8 product cards — each with image, name, star rating, price, and Add to Cart button
- Some cards have red discount tags (e.g. -15%), others have no tag
- New Arrivals section has 6 cards with green "New" tags and single prices (no strikethrough)
- About section uses a two-column layout — legacy image on left, brand story text on right
- Newsletter section has an email input form with a Subscribe button calling handleSubscribe()
- Footer has 4 columns: brand info + socials, Products list, Support links, Contact details
- A hidden toast <div> sits at bottom-right to show cart and subscription feedback messages

style.css — Styling & Layout

- CSS reset on * clears margin/padding and sets box-sizing: border-box globally
- Body uses Segoe UI font, dark gray text, and light #f9f9f9 background
- .container centers content at max 1200px width with auto margins
- .section gives consistent 70px vertical padding; .white-bg and .grey-bg alternate section colors
- Two button styles: .btn-red (solid red, darkens on hover) and .btn-ghost (transparent, fills white on hover)
- Header is position: fixed, dark navy #1a1a2e, always on top with z-index: 999
- Nav links are gray by default, turn red on hover or when .active class is applied
- Hamburger is hidden by default (display: none), only appears on screens below 768px
- Hero uses min-height: 100vh with a dark gradient overlay on a background image
- Product cards have white background, rounded corners, and lift up with shadow on hover
- Card images zoom in slightly (scale(1.06)) when the parent card is hovered
- Discount/New tags are absolutely positioned on the top-left of each card image
- Cart button spans full card width, turns red on hover
- About section uses flexbox with 60px gap between image and text
- Footer is a 4-column CSS grid (2fr 1fr 1fr 1fr) with dark navy background
- Newsletter section has a solid red background with a white email input field
- Toast notification is fixed bottom-right, starts invisible, fades in when .show class is added
- **Media queries:** ≤1024px → 3-column grid; ≤768px → 2-column grid, stacked nav, stacked about layout; ≤480px → single column everything

script.js — Behaviour & Interactivity

- Hamburger click toggles .open class on nav links, showing/hiding the mobile menu
- Clicking any nav link removes .open to auto-close the mobile menu after selection
- Scroll listener deepens the header shadow after 60px scroll, lightens it when back at top
- addToCart(btn) shows the toast, changes button text to "Added!" and color to teal
- After 2200ms, button text and color are restored and toast fades out automatically
- clearTimeout is called before each toast action to prevent overlapping timers
- All href="#..." anchor links use scrollToView({ behavior: 'smooth' }) for smooth scrolling
- e.preventDefault() stops default anchor jump and form submission behaviors
- handleSubscribe() validates the email field is not empty before showing success toast
- Toast text is updated to "Subscribed successfully!" then reset to cart message after 2500ms
- Scroll spy loop checks all <section id> elements on every scroll event
- Compares scrollY + 80 against each section's offsetTop and offsetHeight range
- Matching section removes .active from all nav links, then adds it to the correct one
- This turns the matching nav link red, visually indicating the current section in view
